Cadmus Communications Expands Print Production Partnership with The American Society for Biochemistry and Molecular Biology

Richmond, Virginia (January 3, 2007) – Cadmus Communications Corporation (NASDAQ/GM: CDMS) announced today that it will expand its current print production services provided to American Society for Biochemistry and Molecular Biology (ASBMB) to include *ASBMB Today*, the Society's monthly, 32-page full-color magazine for its members. The full range of production services to be performed at Cadmus' Columbia and Easton, Maryland facilities include copyediting, composition and printing. The journal production services that Cadmus currently provides for *The Journal of Biological Chemistry (JBC)* and *Molecular and Cellular Proteomics (MCP)* will be supplemented by XML conversion services for *JBC* under a separate contract. ASBMB, a leader in the biochemistry and molecular biology community, was an early adopter of Cadmus ArticleWorks™, a comprehensive content delivery and digital rights management system that permits publishers and content providers to market, sell and deliver content-on-demand from their Web site in both electronic and print formats.

ASBMB indicated that Cadmus has repeatedly demonstrated profound market knowledge and best practices for working with the Society throughout their long-standing relationship. Barbara Gordon, executive director at ASBMB commented that, "Our 100-plus year relationship with Cadmus creates a strong business foundation for expanding the partnership we have developed together. Cadmus assisted with the redesign of both *JBC* and *ASBMB Today* which creates a more compelling and consistent publication for our members. Their quality of work, personalized customer service and customized workflows are important factors in producing publications that help strengthen relationships with members and attract new ones."

Nancy Rodnan, director of publications at ASBMB added, "Cadmus' streamlined approach to the production process allows us to work with a single service provider for *ASBMB Today* whereas we were previously monitoring and juggling tasks between two vendors. The end-to-end services furnished by Cadmus automate the production process in a single, highly customized workflow that eases the workload on our end."

Cadmus recently made a \$50 million capital investment in state-of-the-art printing and finishing equipment to support the changing needs of their customers. Bruce Thomas, president and chief executive officer with Cadmus remarked, "This major investment in new equipment positioned us to expand our production capacity, to support a wider range of publications and print runs, and to deliver on our strategy of being a leading provider of full service solutions for professional publishers. We're excited that ASBMB continues to entrust their production needs to Cadmus."

ABOUT CADMUS

Cadmus Communications Corporation provides end-to-end, integrated graphic communications services to professional publishers, not-for-profit societies and corporations. Cadmus is the world's largest provider of content management and production services to scientific, technical and medical journal publishers, the fifth largest periodicals printer in North America, and a leading provider of specialty packaging and promotional printing services. Additional information about Cadmus is available at www.cadmus.com.

ABOUT ASBMB

The American Society for Biochemistry and Molecular Biology (ASBMB) is a nonprofit scientific and educational organization with over 11,900 members. Founded in 1906, the Society is based in Bethesda, Maryland, on the campus of the Federation of American Societies for Experimental Biology. The Society's purpose is to advance the science of biochemistry and molecular biology through publication of scientific and educational journals (*Journal of Biological Chemistry*, *Molecular and Cellular Proteomics*, and *Journal of Lipid Research*), organization of scientific meetings, advocacy for funding of basic research and education, support of science education at all levels, and

promoting the diversity of individuals entering the scientific workforce. Additional information about ASBMB is available at <http://www.asbmb.org>.

“Cadmus...Serving Education, Science, Health”

Statements contained in this release relating to Cadmus' future prospects and performance are "forward-looking statements" that are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statements. Factors that could cause actual results to differ materially from management's expectations include but are not limited to: (1) the overall economic environment, (2) the equity market performance and interest rate environment, which can impact our pension liability, (3) the impact of price increases for energy and other materials and services affected by higher oil and fuel prices, (4) our ability to grow revenue and market share in the educational and government services markets, (5) significant price pressure in the markets in which we compete, (6) the loss of significant customers or the decrease in demand from customers, (7) our ability to continue to obtain improved efficiencies and lower production costs, (8) the financial condition and ability to pay of certain customers, (9) our ability to implement and realize the expected benefits associated with our equipment replacement and consolidation plan, including our ability to successfully complete certain consolidation initiatives and effect other restructuring actions, (10) our ability to operate effectively in markets outside of North America, (11) our ability to realize the tax benefits associated with certain transactions, and (12) our ability to implement and realize the expected benefits associated with our increased operations in Asia and the business opportunities available to the PeriscopeCadmus™ joint venture. Other risk factors are detailed from time to time in our Securities and Exchange Commission filings. The information provided in this release is provided only as of the date of this release, and we undertake no obligation to update any forward-looking statements made herein.
