Cadmus Communications Expands Its Highly Successful Global Packaging Solutions Network

Expanded Facility in the Dominican Republic and a New Facility in Honduras to Support Continued Strong Growth in the Caribbean Rim

RICHMOND, VA, (October 21, 2005) -- Cadmus Communications Corporation (NASDAQ/NM: CDMS), announced the opening of its new facility in the Parque Industrial Itabo, S.A. Free Trade Zone near Santo Domingo, Dominican Republic. This new, expanded facility is the latest in Cadmus' unique, fast-growing, and highly successful Global Packaging Solutions network. The facility provides Cadmus with needed capacity to meet continued sales growth in the Dominican Republic and allows Cadmus to offer additional capabilities to existing customers and prospects. Specifically, Cadmus' Dominican Republic facility produces a variety of printing and packaging materials for customers in apparel, healthcare and other industries for distribution within the Dominican Republic and other parts of the world. In addition, the new facility houses an extensive warehouse and inventory management operation.

Cadmus also announced that it is nearing completion of its new facility in Honduras. The facility is slated to be fully operational in January 2006. It will permit Cadmus to provide global brand management and high quality folding carton production services to apparel and other customers in Central America. This Honduras facility, when combined with Cadmus' existing facilities in Costa Rica and the Dominican Republic, will give Cadmus a unique and highly integrated network of facilities across the Caribbean Rim.

"We are extremely excited about the expansion of our Caribbean Rim operations", said Jerry Lux, President of Cadmus' Specialty Packaging Group. "Our new and expanded facility in the Dominican Republic will, first and foremost, permit us to meet the explosive growth in demand that we have experienced in this market. In addition, because the facility is strategically positioned to expedite the flow of raw materials into the country and the distribution of finished product to our customers, the facility should drive even more growth for Cadmus."

Commenting on the new Honduras facility, Mr. Lux stated, "We are looking forward to bringing the Honduras facility on line. Honduras has developed as a major hub for apparel manufacturing in Central America. Based on initial market response to the planned opening of the facility in Honduras, there's a strong demand waiting to be tapped. In fact, reaction to our moves has been very positive

from both current and prospective customers and it has already opened up a number of new business opportunities for Cadmus.”

Bruce Thomas, Cadmus’ President and Chief Executive Officer, said “The expansion of our operations in the Dominican Republic and our entry into Honduras represent key milestones in the evolution of our Global Packaging model. Our Specialty Packaging business unit has generated compound annual growth – on a pure organic basis – of nearly 15% during the past three years and the pace of growth is accelerating. Our Global Packaging model has been a key to that success and will be a key driver of growth as we go forward.”

Cadmus Communications Corporation provides end-to-end, integrated graphic communications services to professional publishers, not-for-profit societies and corporations. Cadmus is the world's largest provider of content management and production services to scientific, technical and medical journal publishers, the fifth largest periodicals printer in North America, and a leading provider of specialty packaging and promotional printing services.
